### Frequently Asked Question

**Q:** How do I clean out the debris from the interior walls "flutes" of a multiwall sheet?

**A:** When multiwall polycarbonate is cut to size, small particles of dust or plastic may become lodged in the open flutes.

It is important that this debris be cleared from the flutes before installation. Remove debris with a vacuum or blow out with compressed air.

Do not flush the flutes with water because it may take a long time to dry out.

### TRUSSCORE™ PVC Liner Panel

*"Transforming Building Practices"*

Looking for a really great alternative to painted drywall, plywood, plasterboard, or FRP laminate panels? TRUSSCORE™ PVC interlocking liner panels are an excellent alternative to conventional wall systems and can be used in both new construction and retrofit applications.

TRUSSCORE's unique inner 'truss design' provides outstanding spanning capability. This product provides the best strength-to-weight ratio of any interlocking PVC liner panel on the market today. The truss design helps to prevent 'racking' and increases the panel's overall rigidity and strength. With a specially designed tongue-and-groove interlocking system and pre-punched holes for fastening, the light-in-weight TRUSSCORE panel is extremely easy to handle, field-fabricate, and install.

The panel's pre-punched nailing flange serves as a pilot hole; saving both time and dropped screws. The panel's half-inch thick wall design is lightweight and comes in standard and custom lengths.

TRUSSCORE panels require no special training or tools to install and are safe to work with using normal construction practices. The waste material is also recyclable.

The panel's corrosion resistant surface is highly durable and resistant to

Polycarbonate Term

PVC:

Polyvinyl Chloride (PVC) is a thermoplastic material. The basic raw materials for PVC are derived from salt and oil. PVC comes in two forms: rigid and flexible.

Characteristics of PVC include: durable, strong, lightweight, corrosion and fire resistant, making it an ideal construction material.

scratches, moisture, and most chemicals. The product also complies with FDA and USDA guidelines to be used in areas where food is made, processed, or prepared.

All of this makes TRUSSCORE PVC interlocking line panels well suited for a wide variety of interior applications:

- **Commercial:** Car/Truck Washes, Restaurant Kitchens, Laundromats, Supermarkets, Breweries
- **Agricultural:** Poultry, Dairy, and Hog Barns, Riding Stables
- **Industrial:** Refrigerated Warehouses, Marinas, Fisheries, Food Processing Plants, Meat Packaging Facilities
- **Residential:** Garages, Workshops, and Laundry Rooms

## Top Pairing: AmeriLux International and Machine Plus

*"Green Bay Packers' Fourth Mentor-Protégé Program"*

Earlier this month, AmeriLux International (De Pere, WI) and Machine Plus (Green Bay, WI) were honored as the top pairing in the Green Bay Packers' fourth Mentor-Protégé year.

Launched in 2011, the Mentor-Protégé Program pairs larger businesses with smaller ones looking to move to the next level of success. Priority is given to minority or women-owned companies located in NE Wisconsin. The mentoring company provides business exposure, training, resources, and industry knowledge not readily available to the protégés. Mentors use their own time and experience to aid the protégé in their professional growth.

During a course of one year, the mentors offer their protégé's technical, managerial, and financial guidance. AmeriLux's General Manager, Patrick Gauthier, helped Jamie Vesser and his company align their sales and marketing efforts as well as improve operational procedures. The result for Machine Plus was an

increase in sales and the addition of employees.

"Really all I did was help Jamie ask the right questions," said Patrick Gauthier modestly. "He already knew the answers. The best part was seeing him realize his full potential."

Over the last four years, the protégé companies have added 90 full and part-time jobs and experienced revenue growth of 250 percent. The program is administered by AFF Research of Green Bay. ## Cultivate'15 - Columbus, Ohio

*"Largest Horticultural Tradeshow in North America"*

Come and Visit AmeriLux International at Booth# 1438! Whether you're building or expanding or looking to reglaze. We look forward to meeting and talking to you about how we can help you with your next greenhouse glazing project.

### When:

- Sunday, July 12th 9:30 am - 5:00 pm
- Monday, July 13th 9:00 am - 5:00 pm
- Tuesday, July 14th 9:00 am - 2:00 pm

**Where:** Greater Columbus

Convention Center, 400 North High Street, Columbus, OH 43215 USA

**What:** Formerly known as OFA Short Course, Cultivate'15 is an annual convention and trade show offering premier educational and networking experiences, and more than seven acres of tradeshow exhibits including new technology, products, and services.

The tradeshow floor at Cultivate'15 will be the only place in the U.S. where you can visit with all the major players when it comes to new plant varieties, greenhouse structures, and related equipment. This year also sees an expansion of products and services for retailers, nursery production, and landscaping.
