

8" EZ FORMS®

Radius Profile

A Perfect Solution for Curved Walls

A cost-effective alternative to traditional concrete construction, EZ Forms® offers a revolutionary wall-forming system designed to meet the demands of aquaculture and agricultural applications. The all-new radius profile simplifies the construction of round tanks, rotary parlors, water storage systems, manure storage, and other applications requiring curved walls. EZ Forms® delivers a seamless, watertight PVC finish that provides a long-lasting solution.

Made from durable, stay-in-place PVC forms filled with concrete and reinforced with rebar, EZ Forms® ensures exceptional resistance to moisture, corrosion, and impact—making it ideal for high-humidity environments such as fish farms, hatcheries, and agricultural facilities.

Watertight PVC Finish

Provides a seamless barrier, ensuring superior security and easy cleaning.

Quick, Hassle-Free Installation

Horizontal interlocking system, simply 'push-n-click' for fast wall assembly.

Durable & Long-Lasting

Eliminates issues with cracks, leaks, or corrosion found in traditional concrete.

AQUACULTURE • AGRICULTURE • CARWASH • INDUSTRIAL

KEY ADVANTAGES

Horizontal 'Push-n-Click' Install System
Design Versatility - Straight or Curved Walls
Energy & Installation Cost Savings
Easy-to-Clean - Simply Power Wash
Option With or Without Insulation
