

March Newsletter 2011

This month we would like to update everyone on a new approach we have taken with our “Educational Seminars”. As mentioned in the past we have an AIA accredited program that we offer as “Face-to-Face” learning and now we can also offer that program through “Distance” learning. In January we held a “Webinar” and presented our program “Daylighting and Energy Efficiency through Polycarbonate Solutions.” We had a tremendous turn out and because of that we have decided to offer another five “Webinars” this year. The dates and topics are listed below:

March 30th – LEXAN Polycarbonate Glazing: Building Codes and Protocols Explained

May 25th – Our “Standing Seam” Panel Introduction to the Market

June 29th – “Daylighting and Energy Efficiency through Green Polycarbonate Solutions”

September 27th – Green/Sustainability

November 16th – Nanogel/SCIR

Test

The invitation for the “Webinars” will be sent to all our contacts; System Integrators, Contractors, Plastic Distributors, Architects, OEM, Signage and Display companies. Please let us know if your company has a list of Representatives that you would like us to include. We are more than happy to have as many as possible attend.

This is just one more way we are trying to educate the market on polycarbonate products and the advantages that we have to offer over others.

As always, please contact us with any questions or concerns, we always look forward to hearing from you.
