AmeriLux News

AmeriLux International is a value-adding distributor of multiwall and corrugated polycarbonate sheet products, PVC sheet and liner panels, and steel coil.

AmeriLux Logistics | A Division of AmeriLux International

"Passionate about the safe transit of your products and your companies' success."

Since its formation in 2015 by AmeriLux International, AmeriLux Logistics has built and developed relationships with a nationwide network of carriers - qualified and reliable carriers capable of moving anything.

"We've also built customer trust and loyalty," said Erik Voss, Manager of AmeriLux Logistics. "Customers trust that we're going to give them the best freight deal or find them the best possible transportation solution."

As well as building and growing carrier and customer relationships, the AmeriLux Logistics team itself has grown over the last few years. Newcomers, Kristi Strelcheck and Bobby Hintz, have brought valuable experience and knowledge to the team, providing unique insight into the ins and outs of the 3PL industry.

A-Team Members (L to R):
Jim Romenesko, Erik Voss,
Bobby Hintz, Amber Rogers,
Kristi Strelcheck, Tyler Brown

For some freight carriers it is simply about moving cargo from point A to point B. AmeriLux Logistics views freight transportation as much more than just a simple forwarding operation. They are a third-party logistics provider that believes in taking as much pride in your business as you do, exceeding excellence with a personal invested touch.

"We take the time to get to know our customers - both personally and professionally," said Tyler Brown, Business Development Leader. "I think a big strength of ours is we have good people and we're a small brokerage. When you send a load with us, you have everybody on the team talking about it. We all have something invested in it to see that it goes well."

"Every single customer, whether big or small, is just as important as the next. We're small enough to care about the little guy," added Kristi Strelcheck, Account Manager.

"AmeriLux Logistics is one of the best, if not the best, when it comes to customer service, on-time performance and professionalism." - Tammy Howe, Northstar Pulp and Paper

Larger logistic companies often require customers to do things a certain way - to fit within their systems or processes. Not so at AmeriLux Logistics, they have the flexibility to come up with custom solutions. "We let our customers and ourselves think outside the box," Erik said. "Or, we'll fit inside our customer's box."

The knowledgeable team at AmeriLux Logistics is engaging, connecting, and understanding. They are people you will want to get to know. People who are as passionate as you are about the safe transit of your products and your companies' success.

Meet the A-Team:

Bobby Hintz | Account Manager - AmeriLux Logistics

With eleven years of customer service experience in logistics and supply chain management, Bobby Hintz is excited about the opportunity to make a positive impact at AmeriLux Logistics.

"At AmeriLux, people take interest not only in the work to be done but also in one another," says Bobby. "You're encouraged to just be yourself and take chances."

As an AmeriLux Logistics Account Manager, Bobby's role is to optimize and manage freight opportunities, streamlining the loads from start to finish. He enjoys building new relationships with customers and carriers and working together to move freight safely and efficiently.

"I think the most challenging aspect of my role is recovering loads at the last minute due to circumstances out of your control. Challenging but also fulfilling when the load is recovered."

When asked what makes a good third-party logistics company, Bobby had this response: "Consistency and trust. Customers want to be able to trust you and forget about it."

Fun Fact: Bobby has done cliff jumping.

For more information on the brokerage services offered, please contact AmeriLux Logistics at 920.425.3550. We would be happy to discuss your freight delivery requirements and create a competitive, customized solution that will meet your unique shipping needs.

Ask the Tech Expert

Q: What is a roof purlin?

A: A purlin is a horizontal structural member often made from wood or steel that directly supports the roofing material.

Purlins run perpendicular to the slope of the roof as opposed to rafters that run parallel to the slope of the roof.

Purlins transfer the roof load to the main roof structure such as trusses, load bearing walls, or large rafters.

Purlins vary in size depending on the type of structure, loading requirements, and local codes.

The spacing between purlins depends on the type of roofing material, loading requirements, and local codes.

Always check first with your local building inspector or local code requirements.

DIY Tip of the Month

"Sealants"

Only use a "100% silicone" sealant on polycarbonate sheets.

Silicone sealants do not degrade in sunlight. They resist mold and mildew and remain flexible, allowing for building movement.

Do not use roofing caulk.

Consequences of using an incompatible sealant are inadequate adhesion or too rigid of a bond.

Incompatible products contains chemicals that may discolor or damage the polycarbonate sheet.

NOTE: Check the product information on the sealant label **BEFORE** using to ensure compatibility!
