

GROW ROOM PANELS

“Increase Indoor Yields with Reflective Walls”

Like most plants, cannabis plants use light to make energy. Light powers bud growth. **TRUSSCORE™ PVC Interlocking Panel's bright white, reflective surface will help reflect light back to your plants.** By reflecting light back to the plants, they will be able to use more of the artificial light produced by your indoor grow lights. Your plants will grow faster and produce bigger yields. More usable light without increased electric energy consumption.

Since these reflective wall panels never need to be painted 'white', maintenance costs are reduced considerably. TRUSSCORE panels are virtually maintenance free – just wipe or wash clean! These grow room wall panels are also moisture resistant and will not get soft or moldy if they get wet. Cost effective to other construction methods, TRUSSCORE is a lightweight, reflective wall covering that can be easily installed either vertically or horizontally. The panel's hidden fasteners provide a smooth, evenly-reflective finish.

Choosing the right wall covering for your grow room is important. If you need a grow room wall covering that is extremely durable and will hold up for years, **TRUSSCORE™ PVC Interlocking Reflective Wall Panel has your cannabis grow space covered!**

Why is TRUSSCORE™ ideal for the Cannabis Cultivation Industry?

- **Bright White Surface**, reflects indoor grow lights
- **No Backing Required**, quick and easy to install
- **Impact Resistant**, resists marking and scratching
- **Moisture Resistant**, prevents mold and mildew
- **Low Maintenance**, no painting and easy-to-clean
- **Class A Fire Rating**, non-flammable
- **LADBS Approved Panel**, LARR #26036

GROW ROOM PANELS

"Reflective Wall Coverings"

TRUSSCORE™ PVC Interlocking Liner Panels

TRUSSCORE™ PVC Interlocking Liner Panels are ideal for the Cannabis Cultivation and Processing Industry. These reflective wall panels increase the effectiveness of artificial lighting. The bright white surface bounces light back to plants from a wide range of angles. This reflectivity reaches lower portions of the plant and provides bottom buds with light energy for optimum growth.

Designed for the most demanding applications, TRUSSCORE'S smooth finish is easy-to-clean, low maintenance, and abuse resistant. The unique inner web design provides industry-leading spanning capabilities and rigidity as well as high strength to weight ratio. TRUSSCORE panels meet and/or exceed modern hygienic construction and statutory building codes. Choosing the right wall covering is important. Invest your money wisely. **Build an efficient and quality cannabis grow space with TRUSSCORE PVC Interlocking Reflective Wall Panels.**

Reflection = More Usable Light

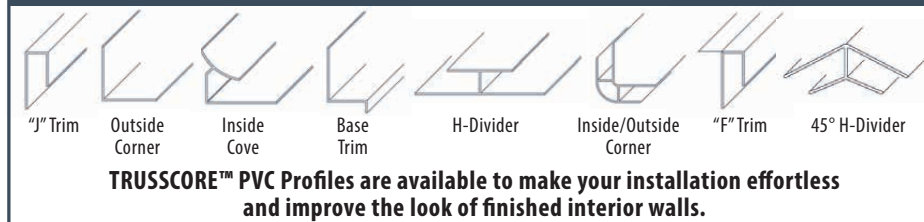

"Reflective wall panels bounce light back to your plants, providing lower buds with light and energy."

PRODUCT SPECIFICATIONS

Profile:
