Creating Brighter Spaces

"Advantages of Multiwall Polycarbonate"

Daylighting is the architectural practice of welcoming natural light into the interior of a building using windows, skylights, clerestories, or vertical glazing. While glass has been traditionally used in these types of applications, it does have some inherent disadvantages.

One of multiwall polycarbonates advantages over glass is its ability to diffuse natural light. Filtered daylight reduces several negative effects of direct sunlight, specifically by minimizing harsh glare, UV damage, and excessive heat gain while maintaining a bright, natural, and inviting atmosphere.

Compared to glass, multiwall polycarbonate is incredibly light in weight and significantly more durable. Virtually unbreakable! Sheets cost less to transport, are easier to handle, cut, and install, and require less structural framing and support than glass.

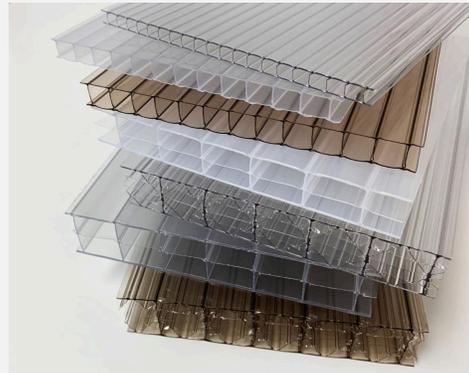

Multiwall Polycarbonate Advantages:

- Highly durable, impact & scratch resistant
- Minimizes glare, UV damage & heat gain
- Easier to handle, fabricate on-site & install

Multiwall polycarbonate sheets are available in variety of colors, thicknesses, textures, and

Multiwall Polycarbonate

"Lightweight yet Durable"

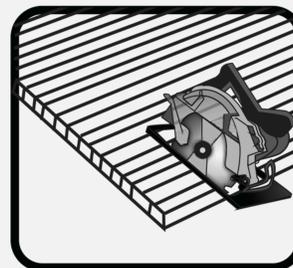

Cut to size and ready to install, our multiwall polycarbonate sheets provide an impressive balance of high impact strength, excellent thermal insulation, UV and fire resistance, and long-term light transmission.

Cutting Tools & Tips

What is the best method for cutting multiwall polycarbonate sheets?

A: A circular saw is ideal for long, straight cuts while a jigsaw works well for curves or intricate shapes.

structures to control light transmission and provide thermal performance.

To learn more about the advantages of using multiwall polycarbonate in your next project, please call 888-602-4441 to speak to a friendly and knowledgeable member of the A-Team.

A fine-toothed saw blade designed for cutting plastic is highly recommended for clean, smooth edges.

Secure the sheet before cutting, measure and mark a line to follow, pay attention to throughput and speed to avoid melting, blow out the flutes with compressed air, and always wear protective gear.

Upcoming Trade Shows

[World Ag Expo | Feb 10-12](#)

- Tulare, CA
- Booth# 6739, 6740 & 6741

[International Builders Show | Feb 17-19](#)

- Orlando, FL
- Booth# S3157

[Southwest Carwash Show | Feb 25-27](#)

- Fort Worth, TX
- Booth# 351

[NFBA Building Expo | Feb 25-27](#)

- Oklahoma City, OK
- Booth# 442

[VISIT OUR TRADESHOW PAGE >](#)

If you plan on attending any of these trade shows, make sure to stop by our booth and say hello!

We'd love to hear about your next project and how we can partner together.

Company Highlights

January's Brand Ambassador

"Communication is Our Currency"

- Susan Fuentes
- Retail Team Lead
- AmeriLux International
