Enjoy Gardening All Year Long Polycarbonate Greenhouse Coverings

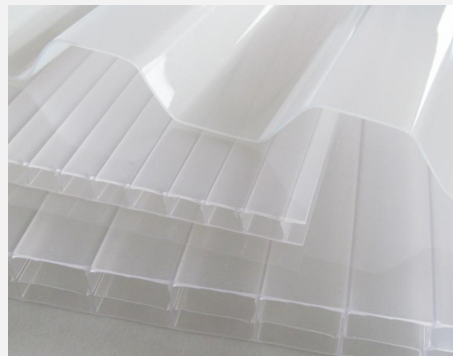

There are many types of greenhouses that you can buy or build, from simple, cost-effective structures to elaborate, expensive ones. The style and size will depend on the climate where you live and the type of plants you want to grow as well as your budget.

In addition to picking the right greenhouse structure, choosing the right greenhouse covering is equally important. The success of your greenhouse depends on it! Plants need light to grow and flourish. Without the right kind of light, plants will not grow strong and healthy.

Montana Shed Center uses LEXAN™ THERMOCLEAR™ 10mm polycarbonate sheets to cover their greenhouses. "It was mostly the strength and loading properties of the product that we really went for due to the area we serve our customers at does get snow. We needed something that could hold up to the northern winters."

The advantages of using multiwall polycarbonate are numerous, offering the greenhouse grower the ideal combination of impact strength, thermal

LEXAN™ THERMOCLEAR™ Natural Diffused Light

LEXAN™ THERMOCLEAR™ 15 Softlite is a 100% light diffusing sheet utilizing advanced polymer technology to scatter light while maintaining a high level of light transmission.

This diffusion feature is excellent for greenhouse applications. Light encompasses both top and bottom leaves resulting in uniform growth, brighter colors, and more usable energy to the plant.

Polycarbonate Profiles

Q: Does the 'longer leg' of the profile face up or down?

insulation, flame and condensation control, and long-term light transmission.

Whether you're a professional gardener or just starting out, a greenhouse covered with polycarbonate creates the optimal environment for growing fresh vegetables, herbs, and flowers in your own backyard. A truly 'green' investment.

DIY: Outdoor Cat House

While cats are resilient, making a shelter for your furry friend will provide them with warmth and safety. An outdoor cat house can be made out of a variety of repurposed materials but if your handy with woodworking tools, building your own cat house out of plywood and wood is a cost-effective DIY project.

UV-protected on one-side, PVCLite PVC corrugated sheets are a great option for a cat house roof. These lightweight yet highly durable PVC sheets are easy to cut, drill, and install. Stocked in white and beige, the sheets smooth, weather-resistant surface is easy to clean and maintain.

Company Highlights

Innovating with Interns: A Summer of Smart Manufacturing

This summer, three UW-Stout interns are creating win-wins at Shape Products by helping automate production by designing vacuum fixtures for robotic arms, replacing manual processes.

They're also leading individual projects—ranging from ergonomic improvements to efficiency tools—gaining hands-on experience while contributing to safety, productivity, and innovation on the production floor.
