Metal Roofing Alternative

KLAR® PVC Corrugated Panels

Like many of the commercial buildings located in Harrisburg, South Dakota, the Wizard Wash/Laundromat and the adjacent storage units were built with steel roofing.

When it came time to replace the roofs, Nick Dowdey was all for using the KLAR® PVC corrugated panel. "I like the acrylic finish on the Klar as this will keep its color and shininess for a long time and won't fade like steel."

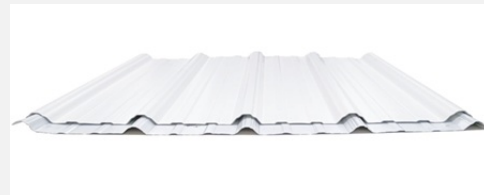

"We chose the color blue to fit in with the car wash theme and color scheme."

KLAR® PVC corrugated panels are manufactured using thermoacoustic multilayer technology. When used as a roofing (or siding) material, they create a more stable and comfortable indoor temperature. In addition, KLAR® panels offer great acoustic properties, reducing noise levels up to 12 decibels.

Compared to other 'like' PVC products,

KLAR® PVC Corrugated Panel

"Ability to span 4' on center"

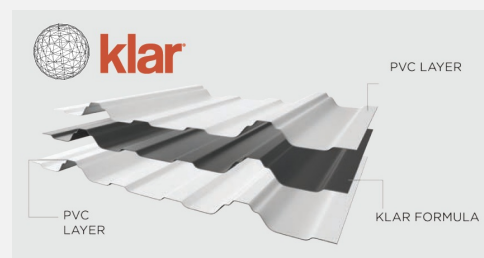

Manufactured with thermoacoustic multilayer technology, KLAR® PVC corrugated panels are extremely durable, will never rust, and are highly resistant to humidity, saltpeter, bacteria, and chemical corrosion.

These impact resistant PVC corrugated panels are perfect for the most demanding roofing, siding, and interior applications. Ideal for new builds and retrofitting projects!

Multilayer Technology

What is the intermediate layer made of, and what does it do?

KLAR® PVC corrugated panels are thicker and offer superior rigidity and stability.

"The contractors found Klar panels easy to cut and install with minimal waste and excellent fitment. The panels also performed well in terms of alignment and sealing. Installation feedback was very positive."

A: The intermediate layer of a KLAR® PVC corrugated panel is a thermal stabilizer that improves span performance.

It can be customized with additives for specific environmental needs, such as increased resistance to extreme temperatures.

Company Highlights

Quarterly Women's Meeting

The women of AmeriLux held their quarterly meeting on May 20th at the AmeriLux headquarters in De Pere, Wisconsin.

This meeting's speaker was Tanya Ditzman, Corporate Philanthropic Advisor with the Wisconsin Humane Society (WHS). Founded in 1879, WHS is an independent, nonprofit organization, operating animal shelters in Milwaukee, Saukville, Racine, Green Bay, Sturgeon Bay and Kenosha.

Everyone had a wonderful time learning more about the WHS mission while making cozy blankets for the dogs and cats at the shelters.

Serving over 40,000 animals in need each year, it was truly inspiring to hear how much WHS

helps these furry friends — providing food, shelter, and medical care while they wait for their forever home.

Warehouse Project Progress

Big strides are happening at the project site! Walls have been going up, and the buildings are really starting to take shape.

Concrete and roofing is complete on the smaller (150,000 sq ft) warehouse. Polycarbonate windows will be going in this month. Overhead doors are in progress. Interior offices are framed and ready for finishes.

Precast wall panels are complete, and roofing is underway at the larger (350,000 sq ft) warehouse. Undergrounds in motion. Loading docks are prepped for install. Interior buildouts will be coming soon. Exterior prep continues around the site.
