

EZ Liner® PVC Interlocking Liner Panels

Q. What is EZ Liner®?

A. EZ Liner® is a tongue-and-groove interlocking PVC liner panel system made from 100% exterior-grade virgin PVC, available in ultra white, gray, and black. Manufactured for durability, its surface is corrosion, moisture, mold, and chemical resistant, offering a smooth and hygienic finish.

Q. Where can EZLiner® Panels be used?

A. Suitable for agricultural, industrial, commercial, and residential interior wall and ceiling applications. EZ Liner® is commonly used in car/truck washes, food processing, dairy facilities, fisheries, grow rooms, kitchens, laundromats, kennels, garages, marinas, stables, office spaces, and more.

Q. Do I need special tools to install EZ Liner® PVC panels?

A. PVC liner panels require no special tools or training to install. Panels may be cut using a fine-tooth blade (12 to 16 teeth per inch) with the blade installed in the reverse direction. Fastening the panels requires a standard drill/screw gun.

Q. Can EZ Liner® panels be applied directly to a masonry wall?

A. Yes, the panels can be installed directly on a flat, clean, and dry masonry wall. To fasten the panels, use tapcon screws. For additional security, apply a bead of PL400 construction adhesive to the back of the panel in a wavy pattern. Adhesive should dry in about two hours. Using both fastening methods together is recommended for optimal results.

Q. Are EZ Liner® panels waterproof?

A. Yes, EZ Liner® panels resist water and are ideal for wet applications. To ensure a watertight seal, we recommend putting a bead of silicone along the inside of the nailing flange before interlocking the next panel.

Q. Is solid sheathing required behind EZ Liner® panels?

A. No, solid sheathing is not required. EZ Liner® panels can be installed directly onto a flat, clean, and dry surface such as studs, furring strips, or masonry walls. For optimal installation, ensure the surface is properly prepared and use appropriate fasteners and adhesive as needed.

Q. Is there a warranty for EZ Liner® PVC panels?

A. Yes, EZ Liner® panels are backed by a 20-year limited warranty. For full warranty information, please refer to the [official warranty document](#).
