The Cassandra Voss Center

"Skylights Add a Contemporary Look to a Historic College Campus Building in WI"

Nestled on the banks of the Fox River in De Pere, WI sits a small liberal arts college dedicated to changing the world by graduating educated, passionate and empowered students. St. Norbert College is a beautiful ninety-three acre college comprised of thirty-seven buildings. Among them, the former St. John's Evangelical Lutheran Church built in 1883. Today, it is in its final stages of being transformed into the Cassandra Voss Center; a tribute to the spirited legacy of Cassandra Voss who passed away in a tragic car accident in 2007 at age 21.

The center will house the college's Women and Gender Studies academic discipline, the Joan P. Schaupp Women's Center, the Men's Initiative, and play host to a number of other student programs and activities. Cassie would have been the first student to graduate from St. Norbert with a degree in Women's and Gender Studies. She was also pursuing a major in English and a minor in Art. Cassie often talked about creating a space on campus for all gender-related programming.

One of the goals in the renovation was to preserve the building's

Frequently Asked Product Question

Q: How are polycarbonate panels protected during shipping?

A: A custom wooden crate is built for each order. A crate can hold up to 2,000 pounds of product.

Note: This is only a general guideline. Exact requirements are project specific.

Serving with Pride

"Members of the A-Team Venture to the Dominican Republic on a Mission"

Ray Guns, an AmeriLux Warehouse Team Leader, joined Chief Financial Officer Julia VerHaagh and several other volunteers on a mission trip to the Dominican Republic. Partnering with the non-profit organization [One Child Matters](#) Project #16, a Division of Bethesda Ministries, Ray and Julia worked as part of a team tasked with completing the construction of a church and child development center. The project was located in an outlying rural area just north of the city of Santiago.

The group's work included physical labor (sanding, priming, painting, and mixing concrete), fellowship, and fostering spiritual relationships. "Everyone in the group rolled up their sleeves and gave what they had," said Julia. "It was very inspiring."

When asked "What did you learn from this experience?" Julia responded, "The people are very open, unassuming, friendly, giving and gracious. The papaya's, mangos, watermelon and avocado's are the size of which I have never seen! This area was very poor and without most of the comforts we take for granted."

This mission trip was a great way to put Julia's and Ray's faith into action, serve the Haitian people, and bring hope, healing and help to those in need. This was both Julia and Ray's first mission trip and both said this trip will stand out in their minds as a life-changing experience. "I learned not to take anything for granted," said Ray. "This trip made me appreciate just how good I really have it."

Glass Block

"A Timeless Building Material"

Solid glass block is a non-load bearing building material. Used most often as an architectural element in both commercial and residential construction, glass block is considered a practical aspect of design because natural light can be filtered in. Glass block is made largely from sand and limestone and is 100% recyclable. Solid blocks are formed by pouring liquid glass into molds and let to cool lying down. The result is a unique visual quality on the surface of the glass.

Translucent glass blocks are becoming more and more popular for interior and exterior decoration purposes such as:

- *Bathroom windows (obscures visibility from the outside)*
- *Shower walls/enclosures (eliminates need for shower curtain/shower door system)*
- *Kitchen backsplashes/islands/counter tops*
- *Basement windows (privacy and additional security)*
- *Water features (walls around pool areas, water fountains, reflecting ponds)*
- *Floors or Pavers*
- *Skylights or Sidelites (considered more energy efficient than traditional plate glass windows)*
- *Decks or Balcony's (create a unique privacy screen or dividing wall)*
- *Interior office walls or partitions (maximize the passage of light)*
- *Architectural accents*

Glass block offers excellent performance benefits in noise reduction, insulation, maintenance, waterproofing, energy conservation, durability, and privacy protection.
