AmeriLux News

AmeriLux International is a value-adding distributor of multiwall and corrugated polycarbonate sheet products, PVC sheet and liner panels, and steel coil.

TRUSSCORE™ PVC Wall & Ceiling Panel: "Designed for Demanding Applications"

Looking for a great alternative to painted drywall, plywood, plasterboard, tiled concrete, or stainless steel paneling? TRUSSCORE™ PVC liner panels are an ideal replacement for conventional wall or ceiling systems. Cost-effective when compared to other materials, TRUSSCORE can be used in both new construction and retrofit applications.

TRUSSCORE'S inner truss design provides industry-leading spanning capability. This product provides the best strength-to-weight ratio of any other like panel on the market today. The unique webbed design also helps to prevent racking and increases the panel's overall rigidity and strength.

Highly durable, TRUSSCORE is resistant to scratches, mold, moisture, and most chemicals. The panel's surface will not corrode or support bacteria growth. TRUSSCORE meets or exceeds statutory building codes, satisfying the stringent requirements of modern hygienic construction.

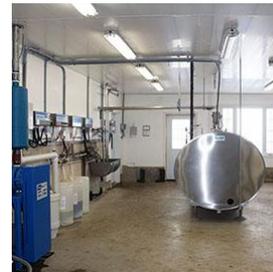

With a specially designed tongue-and-groove interlocking system and pre-punched holes for fastening, the lightweight TRUSSCORE panel is extremely easy to handle and install. TRUSSCORE panels require no special training or tools to install and are safe to work with using normal construction practices. Working green - the waste material is recyclable!

TRUSSCORE™ is designed for a wide variety of demanding applications including:

CAR & TRUCK WASHES: TRUSSCORE is perfect for the rigorous requirements of car wash bay walls and ceiling coverings. The highly-moisture resistant panel is well suited to wet environments and will not support mildew or mold growth. [Download Product Sell Sheet](#)

INDOOR GROW FACILITIES: TRUSSCORE'S bright white, reflective surface will help reflect light back into the grow room. Plants will be able to use more of the artificial light produced by indoor grow lights - they will grow faster and produce bigger yields. [Download Product Sell Sheet](#)

Wherever you need a smooth finish that is easy-to-clean, low maintenance, hygienic, and abuse resistant, TRUSSCORE has your project covered. [Learn more about the PVC Wall and Ceiling](#)

TRUSSCORE is a trademark of MSW Plastics. "A leader in plastic extrusion"

Meet the A-Team:

Kristi Strelcheck | Account Manager - AmeriLux Logistics

Kristi Strelcheck is no stranger to the logistics and transportation industry. She brings seventeen years of experience to the AmeriLux Logistics A-Team. While at her previous employer, Kristi was responsible for Carrier Management, and it was there that she first learned about a company called AmeriLux.

"I had no intentions of adding another carrier/broker to the mix. But after meeting Erik and hearing the AmeriLux story, I wanted to give him a shot at our business," Kristi explained. "AmeriLux Logistics did great with it! We worked together for well over a year."

Hearing the news that her employer was closing their doors, Erik Voss, AmeriLux Logistics and Transportation Manager, reached out to Kristi to see if she would be interested in an opportunity with AmeriLux Logistics. "When I came in for my interview I just loved the feeling that I got here," Kristi said.

Kristi has been with the A-Team for approximately four weeks now. She sees her role as one of maximizing the efficiency of the operation and enhancing the customer experience through AmeriLux Logistics. What's been the most challenging aspect of her role so far? Kristi had this to say: "Y'all only had to learn one person's name but I had to learn over forty new names. And, I'm still working on that!"

Fun Fact: Kristi might be a Texan but she would actually love to live in Alaska someday!!

For more information on the brokerage services offered, please contact [AmeriLux Logistics](#) at 920.425.3550. We would be happy to discuss your freight delivery requirements and create a competitive, customized solution that will meet your unique shipping needs.

Giving Thanks:

Remembering the "Thanks" in Thanksgiving

This month of November, we celebrate Thanksgiving. It has been an official holiday since President Abraham Lincoln proclaimed a national day of "Thanksgiving and Praise" in 1863. But the Thanksgiving is more than turkey, stuffing, football, or shopping. It is a time to reflect. To appreciate all we have. To recognize and celebrate those we are thankful for in our lives.

I asked my fellow A-Team members who they are thankful for in their lives. Here are some of their heartfelt responses:

- **Kyle Geohegan (Distribution Center):** "I'm thankful for my wife, who supports me in everything I do and will be bringing our child into the world in May."
- **Julia VerHaagh (CFO):** "For me, this is such a personal question because it is both good and horrible to be thankful for cancer. The fact that cancer has made my Mom actually live and enjoy what life she has left - it is good. The fact that we are spending more time together than previously - it is good. Yet, knowing her time is short and will probably be filled with some really bad suffering - it is horrible. I am thankful for my Mom and truly thankful for the health of my children and the rest of my family."

- **Susan Dutton (Director of Organizational Development):** "I am thankful for those who trust me to assist with their human journey. I have the best job in the world! I get to help people grow toward their own potential every day. I am so grateful for that privilege."
- **Joe Nick (Vice President of Operations):** "I am most thankful for my family this year. We are now a family of three, my beautiful wife Hillary and our new healthy baby boy, Gordon Jay Nick."
- **Kristi Strelcheck (Account Mgr. - AmeriLux Logistics):** "This year I have so much to be thankful for and the opportunity to join the AmeriLux Family is definitely at the top of my list!!!"

This holiday season, let's take a moment to stop and be thankful for the people who mean so much in our lives and who we sometimes take for granted. Let's celebrate our freedom and opportunity, and look to the future with optimism. "Is this a great country, or what...?!"

Happy Thanksgiving Everyone!

Ask the Tech Expert

Q: Do I need special tools to install TRUSSCORE™ PVC Panels?

A: TRUSSCORE™ panels require no special tools or training to install.

The tongue-and-groove interlocking system makes both vertical and horizontal installation quick and easy.

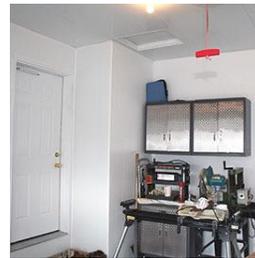

Panels can be cut using a fine tooth blade (12 to 16 teeth per inch) with the blade installed in the reverse direction.

Fastening the panels requires only a standard drill/screw gun.

A one-part, neutral core silicone sealant may be used to seal corners or repair small holes.

DIY Tip of the Month

"Never Paint Again"

Looking for a cost-effective, low maintenance alternative to painted drywall?

Brighten the interior appearance of your garage, workshop, or laundry room with TRUSSCORE™ wall and ceiling panels.

The panel's bright white finish reflects light back into the room, making it feel lighter and brighter.

Painting is not most people's favorite past time. TRUSSCORE'S attractive surface appearance will never need to be painted, coated, or otherwise sealed. These panels are virtually maintenance free!
