

Hurricane Storm Panel

A Great Alternative to Plywood or Metal Storm Shutters

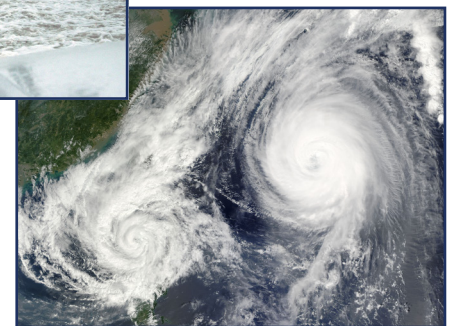

Lightweight yet extremely durable, clear polycarbonate storm panels allow ample daylight to pass through while effectively protecting windows and doors from hurricane damage. These transparent hurricane shutters have been rigorously tested by independent third parties to be used in extreme wind conditions.

Tests included an impact test which involved shooting a wooden 2x4 at a 16mm 3-wall polycarbonate panel and a cycle test to determine if the multiwall polycarbonate panel could withstand rapid pressure changes. The Hurrigal storm panel has been certified by a third-party quality insurance entity and when installed properly meets high velocity hurricane zone (HVHZ) applications.

Features & Benefits

- Transparent
- Strong & Durable
- Provides Protection
- Easy-To-Install
- Removable & Reusable
- Tested & Certified

Let the daylight in while protecting
glass windows and doors!
