

# LEXAN™ CLINIWALL™ AC6200FR SHEET

## PRODUCT DATASHEET

### DESCRIPTION

LEXAN™ CLINIWALL™ AC6200FR sheet for hygienic internal wall cladding. It contains a silver-ion additive which is a known additive to have the potential capability to reduce the growth of microorganisms significantly. The additive is fully distributed throughout the sheet; potential scratches on the surface of the sheet will, under normal circumstances, not affect the presence and the activity of the silver-ion additive throughout the life time of the sheet. In addition to good flammability and smoke performance, it offers excellent mechanical properties like impact, stain, blood and urine resistant combined with ease of processing, making it an excellent candidate for a wide range of applications in industries such interior wall cladding and sandwich panel.

◆ These property values have been derived from resin data for the material used to produce this sheet product. Variation within normal tolerances are possible for various colors. These typical values are not intended for specification purposes. If minimum certifiable properties are required, please contact your local SABIC, Functional Forms representative. All values are measured at least after 48 hours storage at 73°F/50% relative humidity. All properties are measured on injection-molded samples. All samples are prepared according ISO 294.

## PROCESSING

LEXAN™ CLINIWALL™ sheet is suitable for cold line bending and can be mounted on a wall with a simple glue solution. For details, we refer to our processing guide for AC6200FR sheet.

LEXAN CLINIWALL sheet is suitable for thermoforming. To reach optimal results the materials needs to be heated with sandwich type heating systems to reach uniform heat uptake. Pre-drying of this material is necessary. Pre drying at 212°F for 2 hours /0.039” thickness.

LEXAN CLINIWALL sheet has a processing window between 320 and 392°F. When forming, a draft angle of 3 degrees should be allowed. Post mould shrinkage is dependent on tool temperature and environmental circumstances, but will typically be in the range of 0.5-0.9%.

## WARRANTY

LEXAN CLINIWALL AC6200FR sheets will not break due to loss of impact strength when used indoors within ten (10) years of the date of sale by SABIC. See warranty for exact details.

## SAFETY

The processing guidance given in this documentation is given in good faith and the trust that in all cases you wear the correct Personal Protective Equipment (PPE), e.g. helmet, proper gloves, safety goggles etc. to safely fabricate, e.g. (but not limited to) sawing, cutting, forming our sheets and films. In all cases you should follow local and national regulations around the wear of PPE's prescribed or mandatory to perform these tasks in a safely manor.
